

Pattie Brooks Anderson

Variety of Media

About

- Stunning color and rich black lines are the signature characteristics that make Pattie's work truly unique.

"Inter-connectivity of life" is how Anderson explains the curvilinear lines that web her mystical paintings. She works intuitively and often doesn't realize what she's painting until it's completed.

"I have been painting and creating art in a multitude of media for many years. I have many themes but within all themes, I want to impart an overall awareness of the interconnectivity of all forms of life."

Artist Statement

Metamorphosis and rebirth are constant themes, and within these themes, an overall awareness of the interconnectivity of all forms of life.

Additionally, I am fascinated with the aboriginal custom of returning annually to sacred sites. For me, each place, or even an animal or an object, seems to take on a sacredness once one has truly experienced it. I often marvel at the beauty of nature unique to each place, animal, or object. They seem to take on an aura of sacredness as a result of the impression they kindle in me.
